

Zupharm Laboratories Website

Project Overview

Zupharm Laboratories Pvt. Ltd. is a WHO-GMP certified pharmaceutical manufacturer and PCD franchise company. This is the official corporate website built to serve three primary purposes:

- 1. **Brand Credibility** — Establish trust with investors and regulatory bodies
- 2. **B2B Product Catalogue** — Enable doctors, pharmacists, and hospital managers to explore 500+ pharmaceutical formulations
- 3. **Lead Generation** — Convert visitors into PCD franchise enquiries and manufacturing partnership leads

Project Status: Phase 1 (MVP) — Version 0.1.0
Live Website: [Deployed on Netlify]
Repository: [GitHub - SPRINT_Pharma]
Company Headquarters: Gurugram, Haryana & Okhla, New Delhi

Tech Stack

Component	Technology	Version
Frontend Framework	React	18.2.0
Build Tool	Vite	5.0.0
CSS Framework	Tailwind CSS	3.4.0
Routing	React Router DOM	6.22.0
Animations	AOS (Animate On Scroll)	3.0.0-beta.6
Motion Library	Framer Motion	10.12.16
Styling	PostCSS + Autoprefixer	Latest
Package Manager	npm	Latest
Testing	Jest + Cypress	Latest
Linting	ESLint	8.0.0
Accessibility	Axe-core	4.7.0
SEO/Metadata	React Helmet Async	1.3.0
Deployment	Netlify	CDN + Edge Functions
CDN	Cloudflare	Global CDN

Team Members & Roles

Name	Role	Contributions
Shahzad Rahi	Founder & Project Owner	Business requirements, brand vision
Piyush	Senior Developer	Architecture, core implementation
Farhat Afreen	Frontend Developer	React components, pages, styling, cleanup
Ayush	Frontend Developer	UI components, responsive design
Tanisha	Frontend Developer	Features, bug fixes, testing
Ujjwal	Frontend Developer	Features, bug fixes, testing
Prashant	Technical Mentor	Guidance, code reviews, best practices

Getting Started

Prerequisites

- **Node.js** v16+ or later
- **npm** v8+ or later (or yarn/pnpm)
- Git for version control

Installation & Setup

1. Clone the Repository

```
git clone https://github.com/Farha-t/SPRINT_Pharma.git
cd SPRINT_Pharma
```

2. Install Dependencies

```
npm install
```

3. Start Development Server

```
npm run dev
```

The app will open automatically at <http://localhost:5173>

4. Build for Production

```
npm run build
```

Output will be generated in the `dist/` folder.

5. Preview Production Build Locally

```
npm run preview
```

Available Scripts

Script	Command	Purpose
Development	<code>npm run dev</code>	Start dev server with hot reload

Script	Command	Purpose
Build	<code>npm run build</code>	Create optimized production build
Preview	<code>npm run preview</code>	Preview production build locally
Test	<code>npm run test</code>	Run Jest unit tests
E2E Test	<code>npm run e2e</code>	Run Cypress end-to-end tests
Lint	<code>npm run lint</code>	Check code quality with ESLint
Generate Data	<code>npm run generate-data</code>	Generate mock data (if needed)

Design & Branding

Color Palette

Color	Hex Code	Usage
Primary Navy	#0B2545	Main backgrounds, navbar, footer
Primary Teal	#0D7377	Buttons, links, accents
Light Teal	#14BDAC	Hover states, highlights
Sky Blue	#E8F4FD	Section backgrounds
Gold/Amber	#D4A017	Premium CTAs, badges
Dark Gray	#2D3748	Body text
Mid Gray	#718096	Captions, secondary text
White	#FFFFFF	Card backgrounds

Typography

- **Font Family:** Inter (primary), Poppins Bold (headings), Open Sans (fallback)
- **H1:** 40–48px Bold
- **H2:** 28–32px Bold
- **H3:** 20–24px Bold
- **Body:** 16px Regular
- **Captions:** 13–14px Regular

Key Design Rules

- Maximum content width: **1200px** (centered)
- Mobile-first responsive design (320px → 1920px)
- Sticky navbar with logo left, links center, CTA right
- Sticky WhatsApp button (bottom right, #25D366)
- AOS (Animate On Scroll) for entrance animations
- FontAwesome icons (v6.5.0) for UI elements

 Routes & Pages

Route	Component	Purpose
/	Home.jsx	Landing page with hero, stats, featured products
/about	About.jsx	Vision, mission, values, certifications modal
/products	Products.jsx	12 therapeutic product categories
/manufacturing	Manufacturing.jsx	Manufacturing facilities, tabs, FAQs, certifications
/franchise	Franchise.jsx	PCD franchise form, USPs, benefits
/why-us	WhyUs.jsx	6 reasons to choose Zupharm + AI tools
/contact	Contact.jsx	Contact form, WhatsApp integration, inquiry types
/blogs	Blogs.jsx	6 blog posts (Knowledge Centre)

 Key Features

-  Currently Implemented
1. **Responsive Design** — Mobile-first, tested on all breakpoints

2. **8 Fully Functional Pages** — Home, About, Products, Manufacturing, Franchise, WhyUs, Contact, Blogs

3. **Dynamic Stats Counter** — Animated counters on homepage

4. **Contact Forms** — Franchise enquiry, general contact, inquiry types

5. **Product Showcase** — 12 therapeutic categories with descriptions

6. **Blog/Knowledge Centre** — 6 curated articles with dynamic blog view

7. **Certifications Modal** — Interactive certification details

8. **WhatsApp Integration** — Floating button for direct messaging

9. **SEO Optimization** — React Helmet for metadata

10. **Accessibility** — ARIA labels, semantic HTML, axe-core compliance

 Reusable Component Library

18 pre-built components ready for future features:

- Forms & inputs (LeadForm, FilterBar)
- Data display (Accordion, Tabs, Pagination, ProductCard)
- Layouts (CardGrid, IconGrid, TwoColumnText)
- Navigation & carousels (CertificationCarousel)
- Media & downloads (DownloadButton)

 Deployment

Netlify Deployment

Current Status: Deployed and live
Cache Control Rules: Configured in `netlify/_headers`

Deploy Steps:

1. Push to GitHub
2. Connect repository to Netlify
3. Set build command: `npm run build`
4. Set publish directory: `dist`
5. Netlify auto-deploys on push

Environment Variables (if needed):

```
VITE_API_URL=https://api.zupharm.com  
VITE_CONTACT_EMAIL=info@zupharm.com
```

Environment & Configuration

Vite Configuration

- **Alias:** `@` points to `/src` for clean imports
- **Dev Server:** Auto-opens in browser
- **React Plugin:** Enabled with Fast Refresh

Tailwind CSS Configuration

- **Content:** Scans `./index.html` and `./src/**/*.{js,jsx,ts,tsx}`
- **Custom Colors:** Teal, Navy, Primary variants
- **Font:** Inter family extended
- **No plugins:** Uses only Tailwind utilities

PostCSS

- **Tailwind CSS:** Processes Tailwind directives
- **Autoprefixer:** Adds vendor prefixes automatically

Build Statistics

- **Active Pages:** 8
- **Layout Components:** 3
- **Reusable Components:** 18
- **Total Components:** 29
- **Lines of Code (JSX):** ~2,500+
- **Global CSS:** 1,500+ lines
- **Build Output:** ~150KB (optimized)

Code Quality

Linting

```
npm run lint
```

Checks for code quality using ESLint with React plugin.

Testing

```
npm run test  
npm run e2e
```

- **Unit Tests:** Jest with React Testing Library
- **E2E Tests:** Cypress browser testing
- **Accessibility:** Axe-core integration

Dependencies Overview

Core Libraries:

- `react@18.2.0` — UI library
- `react-dom@18.2.0` — DOM rendering
- `react-router-dom@6.22.0` — Client-side routing
- `react-helmet-async@1.3.0` — SEO metadata management

Animations & Effects:

- `aos@3.0.0-beta.6` — Scroll animations
- `framer-motion@10.12.16` — Advanced motion effects

Styling:

- `tailwindcss@3.4.0` — Utility-first CSS framework
- `postcss@8.4.0` — CSS transformation
- `autoprefixer@10.4.0` — Browser prefixes

Dev Tools:

- `vite@5.0.0` — Build tool
- `@vitejs/plugin-react@4.0.0` — React support
- `eslint@8.0.0` — Code quality
- `jest@29.0.0` — Unit testing
- `cypress@13.0.0` — E2E testing

Cleanup & Maintenance (June 10, 2026)

Removed Dead Code:

-  `Vision.jsx` (empty placeholder)

- ☒ src/vision/ folder
- ☒ src/styles/manu.html
- ☒ 8 page-specific stub components
- ☒ main.js (old vanilla JS)
- ☒ QA folder (testing documents)

Preserved:

- ☒ Reusable component library (18 components)
- ☒ All documentation (plans/ & release/)
- ☒ Core functionality (all 8 pages)
- ☒ Configuration files

Known Issues & Limitations

Issue	Status	Notes
Testimonials section	Planned	Component ready, awaiting content
Third-party manufacturing page	Planned	Documented in phase 2 roadmap
Investor section	Planned	Not yet implemented
Advanced filtering	Future	Components ready (FilterBar, Pagination)

Documentation

- **Project Blueprint:** [plans/Master_Context_Specification.md](#)
- **Implementation Guide:** [plans/Comprehensive_Implementation_Guide.md](#)
- **Refactoring Plan:** [plans/refactoring_plan.md](#)
- **Release Notes:** [release/Release_Notes_v1.0.0.md](#)

Contributing

1. Create a feature branch: `git checkout -b feature/your-feature`
2. Commit changes: `git commit -m 'Add new feature'`
3. Push branch: `git push origin feature/your-feature`
4. Open a pull request
